

Friday Maths Activity

Today you will be taking part in the Countdown Challenge on Nrich. Please use the link below:

<https://nrich.maths.org/6499>

The aim of the game is to use the number cards chosen to get as close to the target number as possible using $+$ $-$ \times \div . You can only use each number card once!

Example:

Reset Play

100 50 2 5 2 10

I managed to make 380!

$$100 \times 5 = 500$$

$$50 \times 2 = 100$$

$$500 - 100 = 400$$

$$2 \times 10 = 20$$

$$400 - 20 = 380$$
